Ozone Kills Bacteria, Viruses and Mold in Pools

Ozone Generator
The Hydro-Force™ Clear Water Pool System generates ozone and is virtually maintenance-free and only requires dry air to operate efficiently.

Nano-Bubble Generator
What makes the Hydro-Force™ Clear Water Pool System so advanced is the high concentration of ozone released into the water by our patented Nano-Bubbles generator. Nano-Bubbles are so small (1/10th the diameter of a human hair) they remain submerged for up to an hour, compared to a normal bubble which rises in seconds. This dramatically increases the amount of ozone which is released into the pool water. By using the Nano-Bubbles generator the purifying power of ozone is dynamically increased.

Better For The Environment
Ozone is a naturally occurring powerful oxidizer
Ozone changes back to oxygen after its cleaning process is complete
No by-products left in the water to harm the environment when the pool is drained

Advantage
• The affordable, compact system to clean your Above Ground Pool. It is healthier for swimmers, saves money and is better for the environment!

• Use Nature's powerful sanitizer, Ozone, to clean your Above Ground Pool

Saves You Money
• Will reduce heavy chemical usage (depends on outdoor temperature and amount of bodily impurities that are introduced to the pool)

Better For The Environment
• Ozone is a naturally occurring powerful oxidizer
• No by-products left in the water to harm the environment when the pool is drained

Just Add Salt And Say Good Bye To Pool Chemicals

Working with common table salt, the Hydro-Force™ Flowclear Chlorinator makes pool maintenance easy by eliminating the need for pool chemicals and providing swimmers with clean, clear pool water that doesn't irritate their skin or burn their eyes. By adding common table salt or sodium chloride to swimming pool water, the Hydro-Force™ Flowclear Chlorinator is able to separate the salt into the two basic elements of sodium and chloride. As part of the daily filtration cycle, pool water passes through the chlorinator's electrolytic cell producing chlorine that instantly dissolves into the water, which destroys bacteria and algae on contact and oxidizes other organic materials.

Ozone

Kills Bacteria, Viruses and Mold in Pools

The Bestway Hydro-Force Sand Filter now ships with an integrated Ozonator! Sand filtration has long been the gold standard of swimming pool water filtration, while ozonation is renowned for water purification and the environmental benefits from the reduced use of pool chemicals. By combining sand filtration with ozonation, swimming pool water is sure to be clean clear and totally refreshing.

- Durable, corrosion-proof filter tank
- 6-position valve for easy control
- Top flange clamp design allows 360 degree rotation for easy installation
- Easy-to-read pressure gauge
- Strainer for separating leaves and other rough debris
- Provides clean and clear swimming pool water
- Ozone output: 150 mg/h
- Powerful**
- Ozone is the most powerful oxidizer and disinfectant that can safely be used in pools.
- Healthy**
- Ozone leaves no chemical by-products in water, no chemical taste or smell.
- Safe**
- Ozone cannot explode, is not a fire hazard, and does not affect the pH balance of water.
- Key Benefits**

UVcareful™

The Reliable Sun Protection Line™

Exposure to Ultra-Violet radiation causes not only sunburn but also lasting skin damage that can result in premature skin aging, wrinkles and possibly skin cancer. Excessive exposure to Ultra-Violet radiation can also cause eye disorders such as cataracts. Young children do not understand the dangers of Ultra-Violet radiation but parents do! Protect your children with sun shade, sunscreen and specially design UV Careful™ products. It's all in the name UV Careful™.

UPF or Ultra-Violet Protection Factor is the amount of sun protection offered by the unique properties of the materials used to make this product.
